## Drug testing positivity rates has skyrocketed in the Nation!!!

The US drug testing positivity rate has increased in the US workforce. It has reached its highest in over a decade at a 30% increase. Over the last five years in general U.S. workforce urine drug testing, pre-employment positivity increased 17.4%, while post-accident positivity increased 26%. The increase has a lot to do with legalizing of marijuana in certain states (Not Texas) and has definitely affected companies with a zero-tolerance policy. It is important for workers to know that certain employers are required to test for marijuana under federal law and if they use marijuana, they can still lose their jobs. For example, the Department of Transportation has a zero-tolerance policy any employee performing safety sensitive functions or in the transportation industry are responsible for providing a safe work environment for your co-workers and the traveling public. People who use drugs during working hours or before work can still be impaired and dangerous to co-workers, the general public and themselves. We can help you and your employees keeping you drug free by performing drug testing at your locations or in our office and having you in our Randoms program will help keep your company drug free. Take preventative action now and contact our office at 432-332-9421. We can have your company signed up today!!!
