### **Fentanyl abuse on the rise!!!**

Fentanyl is a synthetic opioid that is up to 50 times stronger than heroin and 100 times stronger than morphine. It is a major contributor to fatal and nonfatal overdoses in the U.S. There are two types of fentanyl: pharmaceutical fentanyl and illicitly manufactured fentanyl. Both are considered synthetic opioids. Pharmaceutical fentanyl is prescribed by doctors to treat severe pain, especially after surgery and for advanced-stage cancer. Last year we lost over 107,000 Americans to overdoses, largely driven by illegally manufactured Fentanyl that is laced with other drugs such as cocaine and methamphetamines. CBP agents seized an unprecedented 10,500 lbs. of the deadly drug in 2021, and seizures have already surpassed 12,000 lbs. so far this year the most fentanyl ever seized in a single year in the United States. Illegal manufactured Fentanyl is the cheapest drug on the market that dropped from \$8 dollars to \$1 dollar a dose now which is why this has triggered our younger population. Having a loved one go through the addiction is emotionally exhausting and having to watch our young ones fall apart day by day can take a toll on your family. Drug Screen Compliance offers a fentanyl drug testing panel to help you determine if anyone one in your household is using this harmful drug. For additional information please contact our office at 432-332-9421.
